

## Project Development Phase Model Performance Test

Date	10 November 2022
Team ID	PNT2022TMID13447
Project Name	Estimation of crop yield production
Maximum Marks	10 Marks

### Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	<p><b>Dashboard design</b></p> <p><b>1. Seasons With Average Productions</b></p> <p>As production of crops depends on different seasons, so let's plot the graphs to visualize the average production based on different seasons.</p> <p><b>2. With Years Usage Of Area And Production</b></p> <p>In our dataset we also have a year's columns by which we will plot a line and area graphs to see the change in these both data with respect to increase in years</p>	<p><b>5 Visualization &amp; Graphs</b></p> <p><b>1. Seasons With Average Productions</b></p> <p><b>2. With Years Usage Of Area And Production</b></p>

### 3. Top 10 States With Most Area

As we have an area data in our dataset, we will be plotting some graphs to visualize the top 10 Indian states .

#### 4.State With Crop Production

There are so many different crops produced in Indian and most of us don't know which crop is belongs to which state so we will be plotting and highlight the states in map according to different crops.

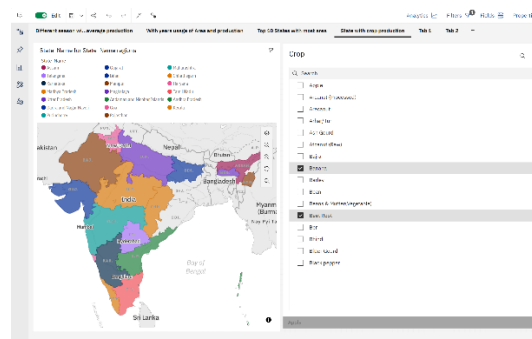

## 5. States With The Crop Production Along With Season

Taking forward the previous plot we will be fetching the state name and showing it in a text table whenever different crops are chosen.

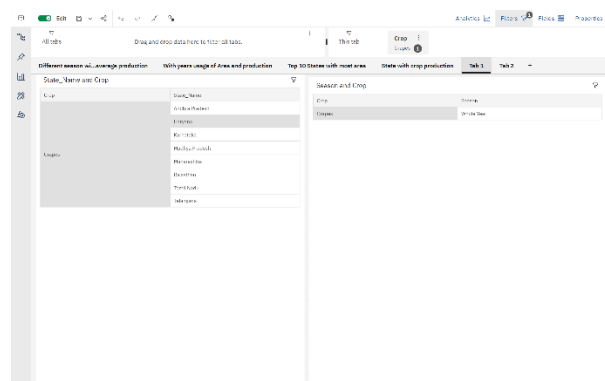

### 3. Top 10 States With Most Area

#### 4. State With Crop Production

## 5. States With The Crop Production Along With Season

6.	Data Responsiveness	Explore powerful visualizations of your data in IBM Cognos Analytics
3.	Amount Data to Rendered (DB2 Metrics)	Load the data from a data file in a delimited format (CSV or TXT) located on a local network or in an object store (Amazon S3 or IBM Cloud® Object Storage) to IBM® Db2 Warehouse on Cloud.

**Crop Report**

**crop range with season**

**Area wise production**

**crop**

**Area**

The dashboard displays two charts. The left chart, 'crop range with season', is a bar chart showing production for various crops. The right chart, 'Area wise production', is an area chart showing production for various areas. Both charts have a y-axis labeled 'Production' ranging from 0 to 140,000,000. The x-axis for both charts lists various crops: Apple, Ash Gourd, Barley, Bar, Blackgram, Cardamom, Cashew, Chickpea, Coffee, Coconut, Cumin, Fava Beans, Green Gram, Jowar, Kidney Beans, Lentil, Maize, Mung Bean, Mustard, Okra, Pigeon Pea, Ragi, Rice, Sorghum, Soybean, Sugar, Sweet Potato, Tomato, Urad, and Wheat.
